

Stars (feat. Kenny Chesney) [Bonus Track]

Grace Potter

I lit a fire with the love you left behind
And it burned wild and crept up the mountain side.

I followed your ashes into outer space

I can't look out the window

I can't look at this place

I can't look at the stars

They make me wonder where you are

Stars

Up on heaven's boulevard

And if I know you at all

I know you've gone too far

So I, I can't look at the stars

All those times we looked up at the sky

Looking out so far

We felt like we could fly.

And now I'm all alone in the dark of night

The moon is shining But I can't see the light And I can't look at the

Stars

They make me wonder where you are

Stars

Up on heaven's boulevard

And if I know you at all I know you've gone too far

So I, I can't look at the stars Stars

Stars

They make me wonder where you are

Stars

Up on heaven's boulevard

And if I know you at all

I know you've gone too far

So I can't look at the stars
