

WANTED U

Joji

[Verse 1]

Here I am

Torn into a thousand shapes and folds

Torn into a thousand ruins, I know

Fornicate inside your broken arms

Before I grow a smile your way, no more[Verse 2]

I can't tell

If all my answers correlate at all

I'm telling you a thousand things, I know

[Chorus]

I've been missing a long time

To know I wouldn't move

I've been waiting my whole life

To know I wanted you

Are you feeling me slowly?

You can take your fucking time

And I promise I won't lie

We'll make it out alive[Verse 3]

I'm on trial

I'm not so good at hiding lonesome truths

You see it on my face when I turn blue

So punish me, I'm hanging on your noose

So pull me up so I can breathe with you

[Chorus]

I've been missing a long time

To know I wouldn't move

I've been waiting my whole life

To know I wanted you

Are you feeling me slowly?

You can take your fucking time

And I promise I won't lie

We'll make it out alive
